	<p>journals of Ukraine; 7 articles in foreign journals and 46 theses. Prepared 2 own monographs and 2 in co-authorship. In 2018, I received the diploma of the winner of St. Vladimir Prize for the publication of the monograph "Legal regulation of the use and protection of lands of public buildings" in the category of legal education and science.</p> <p>I usually take part in international and all-Ukrainian scientific conferences and seminars. I also have certificates of participation in scientific conferences held in EU countries. Successfully completed internships and training in international programs: 1) scientific internship in law in combination with intensive study of English at the West Finnish Institute in Guittinen (Finland) from 30.01.2017 to 04.02.2017 (108 hours.); 2) educational and scientific internship "Legal Methods and Education" at the Institute of Oriental Law, University of Technology, Business and Design, Wismar (Germany) from 17.07.2017 to 29.07.2017 (108 hours).</p> <p>The main areas of research: legal regulation of realization and protection of land rights; legal regulation of use and protection of lands within settlements, organic production.</p>
Paper/Presentation Title (Unpublished Research or Review or Field Work)	<i>Current State and Determination of Prospects for the Development of Organic Production in Ukraine</i>
Keywords	Organic products; Agricultural sector; Agricultural lands; Agriculture; Ecologically clean products; Agribusiness; Food security
Abstract (100-300 words)	The article analyzes the modern market of organic products, which, in terms of growing consumer demand for environmentally friendly and safe for human health, is very perspective for Ukraine. The increase in the area of agricultural land allocated for organic production, the number of domestic organic operators, the ever-increasing volume of exports of organic products to other countries indicate a steady trend of growth and further development of this market. However, there is a need to implement a set of measures, among them: improving legal support; formation of the infrastructure of the organic products market; ensuring adequate state support; improving the system of standardization and

	<p>certification of production, processing, storage and transportation of organic products; introduction of an effective system of control, sale of organic raw materials, its processing, sale of organic products. The method of materialist dialectics allowed to consider agrarian relations for the creation of organic agricultural products in development and the relationship with its normative regulation. The method of complex analysis was used primarily to study the features of the norms of various branches of law in the process of determining the place and role of legal regulation of organic production in the system of Ukrainian law. The synthesis method was used to identify obstacles and prospects for the development of Ukrainian organic production. The application of the logical-legal method contributed to the further formation of the conceptual apparatus of research, in particular the legal construction of "organic agriculture". The formal-legal method made it possible to reveal the content of normative prescriptions in the sphere of organic production.</p>
