 MOUNTAIN ECOSYSTEMS AND RESOURCE MANAGEMENT
 Ivano-Frankivsk Region, Ukraine :: 19-28 September, 2021**

DELEGATE PARTICIPANT'S PROFILE

	<p>Ms. Antonina Kuz <i>Master student</i> Economic Law Faculty Yaroslav Mudryi National Law University</p> <p>Konotop, Ukraine Tel: +38-097-465-97-12 Email: kuzb.antonina@gmail.com</p>
Highest Education	Master student (Law)
Personal Statement	<p>Dear colleagues! Further I would like to say a few words in order to present myself as a delegate participant for the forthcoming Summer School on 'Mountain Ecosystems and Resource Management'. I am an ordinary student, one of those who cares about the future. In 2020 I graduated from University of State Fiscal Service of Ukraine and obtained Bachelor degree in Law.</p> <p>In 2021 I took a course in International and European Environmental Law. After completing this course, I learned to understand the general concept, origins, structure, basic principles and sources of international and European environmental law. I realized with the impact and scope of environmental law in the national legal system and the European Union. I became aware of the role and principles of European environmental policy, its historical development and trends, the main provisions of the seven environmental action programs. I researched environmental conflict, environmental justice and environmental racism.</p> <p>Being at university, I developed an interest in various aspects of International Environmental Law and quickly understood that those are definitely the areas of my interest. I am truly</p>

	<p>worried about environmental problems, especially about the current threats to river environments. I was born and raised in the industrial town of Konotop, so the air pollution and preservation of the river environments are very sensitive topics to me. It also affected me when I moved to an even larger industrial city in the east of Ukraine. During my studies, I dedicated several research to the environmental issues: problems of waste management in Ukraine, destruction of river ecosystems, ecological conflicts that have caused significant damage to the environment of Ukraine and the problem of the population's ignorance regarding environmental responsibility.</p>
Paper/Presentation Title (Unpublished Research or Review or Field Work)	<i>Green Economy and Microenterprises</i>
Keywords	Green economy; Microenterprises; Business's environmental impact; Green business; Green behavior
Abstract (100-300 words)	<p>The article presents the general characteristics of the concept of green economy, the role of microenterprises and their essence through the prism of "green business", "green behavior" and the system of "green production". The purpose of the article is to determine the effectiveness of the green economy, assess the impact of business on the environment, highlight the interaction of the state and micro-enterprises and their interdependence.</p> <p>Several academic and scientific methods have been applied for the research. Thus, the method of comparative analysis was used to determine the main goals of the green economy and the role of microenterprises based on various government views, including environmental policy. The generalization method have been applied to assess the impact of business on the environment, taking into account previous research by specialized agencies.</p> <p>The purpose of the article is closely related to the idea of drawing attention to enterprises that have a significant impact on the local economy and, of course, affect the social sector</p>

	<p>and the environment. Microenterprises are a key tool of a market economy, so in fact they are the engine of sustainable development in various fields. In particular, if we consider such goals of sustainable development as overcoming poverty and increasing employment, the development of microentrepreneurship plays a significant role in solving them. As a result of this development, a significant number of unemployed people with low welfare can get a job and a stable income by engaging in socially useful activities. In this regard, the gradual increase in the number of people engaged in micro-entrepreneurship can be seen as an important factor in ensuring sustainable socio-economic development, especially in low-income countries. A novelty of the study is the developed proposals to promote environmental sustainability among microenterprises and, as a result, the creation of new ideologies for new microenterprises.</p>
